

SUBMISSION TO QUARANTINE  
BIOSECURITY REVIEW.

~~17~~

Countries trade in products and Foods because they are useful and SAFE to use and EAT. We must BAN toys KNOWN to be loaded with poisons, and BAN foods KNOWN to be diseased, because we know that our customers will NEVER BUY such foods from US.

Therefore, ZERO TOLERANCE must apply to BULK TRADE ~~to~~ ~~safeguard~~ especially in BIO-PRODUCTS To safeguard:  
a) the country, b) the citizens, and c) the TRADER!

Therefore, the ALOP for BIO-TRADE must be ZERO RISK!

Travellers are searched at airports. When one of them succeeds in bringing a diseased plant, and that disease spreads nation wide, then we can change our laws for that item and import diseased products, because our agriculture in that product will have been destroyed.

Until then, our ALOP objective must be ZERO RISK for EVERYTHING agricultural.

I trust you will understand the logic in the above.

MR GUY CARUANA
